## درباره ما

مجموعه‌ی افراساز با بیش از ۳۰ سال سابقه در تهیه و توزیع لوازم بهداشتی ساختمان و با فراهم نمودن با کیفیت ترین و معروف ترین برندهای روز دنیا و با رویکردی کاملاً علمی و تخصصی، توانسته است با توسعه‌ی روابط و تعامل با شاخص ترین معماران و کارفرمایان محترم و با ارائه‌ی خدمات حرفه‌ای از نقش فعال گذشته‌ی خود در اثر بخشی مستمر و پویایی این صنعت پاسداری نماید.

این مجموعه افتخار حضور در تعداد زیادی از پروژه های مهم ساختمانی با کاربری مسکونی، تجاری و اداری کشور را با بهره گیری از معتبرترین محصولات را دارد.

افراساز همچنین با فراهم کردن نمایشگاهی در فضایی با زیربنای ۸۰۰ متر و در ۵ طبقه به عنوان تنها شوروم زنده در ایران، پذیرای شما فعالان این صنعت خواهد بود.

در حال حاضر افراساز نمایندگی رسمی شرکت های زیر است:

- نمایندگی رسمی شرکت TOTO ژاپن، تولید کننده‌ی سرویس های بهداشتی ساختمان، وان، جکوزی و اکسسوری با سابقه‌ی ۴۰ سال حضور در ایران.
- نمایندگی رسمی شرکت TECE آلمان، تولید کننده‌ی انواع فلاش تانک های توکار و کف شورهای طولی (کانالی).
- نمایندگی رسمی شرکت Gardenia Decor اسپانیا، تولید کننده‌ی پوشش های میکروسمنت، رنگ های اپوکسی.
- تولید کننده‌ی کابین دوش در ابعاد مختلف و سایزهای استاندارد با برند پانل دوش.

# NEOREST

WHEN TECHNOLOGY MEETS ESSENTIALS, NEOREST IS WHAT YOU SEE. COMBINING TOTO'S SIGNATURE CLEAN DESIGNS AND THE LATEST TECHNOLOGIES INCLUDING INBUILT WASHLET FUNCTIONS, THE NEOREST SERIES ENHANCE YOUR SMART LIVING FROM THE INNERMOST CHAMBER IN YOUR HOME. WE KNOW A LIFESTYLE THAT LIVES UP TO THE FUTURE IS ABOUT MAKING BETTER TECHNOLOGY THAT TOUCHES YOU FROM WITHIN.

A vanity area with a light-colored wooden countertop. On the countertop, there is a white rectangular sink with a chrome faucet. To the left of the sink, there is a chrome soap dish and a toothbrush holder. The wall behind the vanity is covered in light grey subway tiles. Above the vanity, there is a large white mirror. Two chrome sconce lights are mounted on the wall above the mirror. The vanity is supported by a chrome pipe.

A toilet area with a white toilet. The wall behind the toilet is covered in horizontal light-colored wood planks. A chrome sconce light is mounted on the wall above the toilet. The floor is made of light-colored wood planks. To the left of the toilet, there is a dark grey shower area with a glass door and a chrome handle. The ceiling has recessed lighting.

The floor of the bathroom is made of dark grey square tiles. A grey textured rug is placed on the floor in the foreground.

# NEOREST XH

---

TOTO is dedicated to pushing the limits of innovation to achieve technological break-throughs that improve the quality of life. The NEOREST with Actilight is a powerful cleaning system that brings new levels of health and hygiene to the washroom. Experience the pleasure of using a toilet that always looks and feels brand new.

# NEOREST LE

---

The new NEOREST with Actilight and ewater+ technologies is setting new standards in hygiene. The toilet bowl features a special zirconium oxide coating. It works with the ultraviolet light inside the seat cover to trigger a photocatalytic process that breaks down organic substances. The result is a consistently clean toilet.

# LE BLANC

A MINIMALIST DESIGN THAT EXUDES GRACE AND SOPHISTICATION IS THE OVERARCHING AESTHETIC OF THE LE BLANC SERIES. THE SHAPES ARE REMINISCENT OF THE SMOOTH FORMS OF A FEMININE FIGURE, ADDING A TOUCH OF ELEGANCE AND TENDERNESS TO THE DÉCOR.

# LAVATORIES

A close-up, high-angle photograph of a white ceramic toilet. The focus is on the rim of the bowl and the top of the seat. The lighting is soft and even, highlighting the smooth, clean surfaces of the porcelain. The background is a plain, light-colored wall.

BEAUTY IN THE BASIC FORM OF SIMPLICITY. USER-FRIENDLY CONCEPT WITH HIGH FUNCTIONALITY. WATER-SAVING PROPERTIES THAT ATTRIBUTE TO EARTH-FRIENDLY MATERIALS. THESE ARE THE PRINCIPLES UNDERLYING OUR LAVATORY DESIGNS.

## The complete range TECEdrainline shower channels

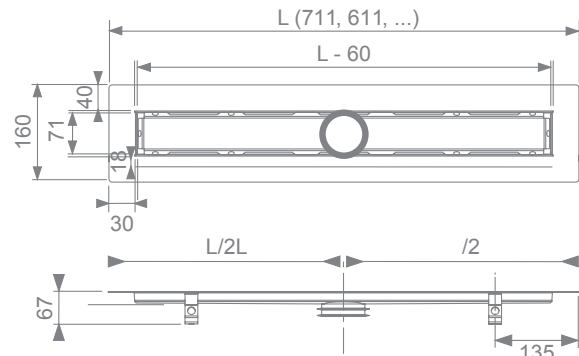

TECEdrainline shower channels clear the bathroom of any items that get in the way such as shower tubs and cubicles, and make it possible to uniformly design the floor. This gives rise to barrier-free bathrooms of generous proportions—real rooms for living in, in fact. TECEdrainline shower channels come either with stainless steel/glass covers or with the “plate” tileable channel where a plain slot in the floor is the only thing that can be seen.

Channel and stainless steel support as set  
Lengths L for channels from 735 to 1535 mm  
(visible dimension after assembly L - 89 mm)

		Total assembly height with upper edge of finished floor	Drain assembly height
Vertical drains	Horizontal drains		
	 DN 40	min. 68,5 mm*  Extremely flat drain	min. 53 mm*
Vertical drains	 DN 50	min. 95 mm  Flat drain	min. 81 mm
	 DN 50	min. 65 mm*  Vertical drain	min. 51 mm*

## TECEdrainline shower channels

The length of the channel body is tailored to the standard dimensions of TECEdrainline grates.

Lengths L for straight channels from 711 to 1511 mm (visible dimension after assembly (L - 60 mm))

Lengths L for angled channels from 944 x 944 to 1244 x 1244 mm (visible dimension after assembly (L - 70 mm))

Option of installation close to the wall

## TECEdrainline – new feeling of freedom in bathroom design.

Setting the height of the horizontal channel using the assembly feet connection of the rotatable outlet to a DN 40, DN 50 or DN 70 drain pipe.

Completely underfilling with screed produces stable anchoring of the channel body and outlet with the unfinished floor.

Seal System adhesive tape: the butyl adhesive tape is a self-adhesive sealant and ensures a water-tight bond between the flange and the screed.

The final step before tiling is the application of the composite seal.

Set fresh nuances – with  
TECEdrainline stainless steel grates.

### Cleaning and hygiene

The drainage channel is made of stainless steel, is closed without corners or cavities which cannot be reached, and there are no screws or threaded components on which hair or dirt can be trapped. It is therefore hygienic and easy to clean. If the outlet should ever become blocked, the immersion pipe can be removed (2nd fig. from right) and a conventional cleaning coil can be used to clear the blockage. A marking on the inside of the drain shows the location of the drain outlet for this purpose.

### Penetrating odour? Not a chance!

### The two-stage TECEdrainline membrane odour trap

Odours produced in seldom-used sanitary equipment because the odour trap has dried out? TECEdrainline membrane odour trap tackles the problem in an innovative way: The immersion pipe of the odour trap has a sealing lip membrane on the inside. This membrane minimises the evaporation of the sealing water-unpleasant odours cannot arise. The system can be retro fitted to any TECE shower channel and also acts as a barrier against vermin and foam.

## The complete range of TECE flushing technology

### As a system provider, TECE takes a holistic approach!

Integration of the universal cistern in brick-wall and dry-wall construction modules is just as important as the flush actuation function in front of the wall.

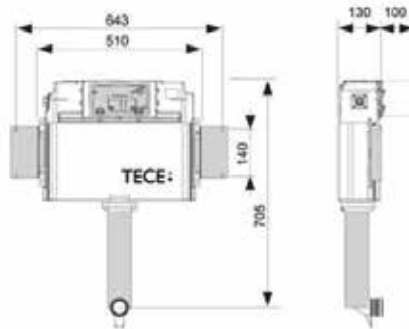

Every TECE push plate therefore fits every TECE cistern. The urinal flush valve completes TECE's flushing technology system. Our customers value times and trust our know-how. The TECE cistern has proved its worth a million over in long-term use.

#### Brick-wall cistern TECEbox basic

With adjustable flush pipe protected against condensate water. For floor-standing toilets.

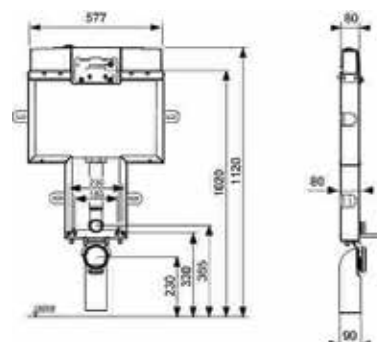

9.041.008

#### Brick-wall construction cistern TECEbox

For wall-hung toilets

**9.300.000**

**TECEprofil toilet module**

To be mounted in metal  
and wooden post-and-beam  
walls or in front of  
solid walls

**9.300.040**

1  
The cistern is sealed and pre-assembled ex factory. It needs to be opened for fine-tuning only.

2  
The cover plate is a compact unit consisting of splash guard, lever mechanism and fixing device, which can be removed easily.

3  
After the shell construction stage the reinforced hose has to be plugged on the filling valve without tools.

4  
For servicing the complete unit including the pushbutton unit can be removed. All settings are retained.

5  
Once the hold-down device has been disconnected and removed the valve can be lifted out of the valve seat and the pull rods bent towards the opening.

6  
The valve can then be removed from the cistern by turning.

7  
The valve seat can be removed easily using the hold-down device.

8  
The filling valve can also be removed thanks to the intelligent filling valve holder.

## Hygiene at the drop of a tab

The bold red flap covering the insert chute is now clearly visible.

Open the flap and drop in a compact tab.

It falls into the container inside the cistern, from where it releases its hygienic cleaning agents into the water.

## Perfect partners in toilet hygiene.

### TECE has concluded a strategic partnership with Japanese sanitation ceramics manufacturer TOTO.

TOTO, world market leader for washlets, has developed wall-hung washlets especially for the European market. The flushing technology is supplied by TECE: Toilet module with TECE cistern and TECEloop push plate. The TECE universal module is upgraded for TOTO washlets with the help of a shell set. The set contains a sound-insulated wall disk for water connection, a power connection with retaining plate and a hollow-wall box.

### Upgrade set for TECEprofil standard modules

Shell set for TOTO Washlet incl. sound-insulated wall disk for water connection, power connection with retaining plate and hollow-wall box.

TECE offers a module with a concealed cistern for the top model among TOTO's washlets—Neorest. The prefabricated unit has automatic flushing, which can be directly connected to the washlet. The ceramics and motor with special actuation on the basis of the TECEloop push plate are sold by TOTO Europe GmbH in Düsseldorf via specialist wholesalers.

### TECEprofil toilet module for TOTO Neorest washlet

Remote actuation possible for the washlet. With control cable for electronic flush actuation hollow-wall box and sound-insulated wall disk.

winner 2011

product  
design award

2012

DESIGN PLUS

The toilet terminal TECElux hides the working parts behind the wall. An extremely flat glass facing closes the inspection opening and conceals the cistern, connections for water and power and - depending on the version - an odour extraction or height adjustment for the ceramics.

Let the future come with TECElux – and let it look good: For the first time, functions that were previously only available as individual solutions are combined in one toilet.

"sen-Touch"

**The electronic flush actuation TECElux "sen-Touch":**

A sensor detects when a person is approaching the toilet, and only illuminates the flush buttons then. A slight touch with the finger is all that is needed to actuate the flush. Within a range of 10 mm the flush can even be actuated without any contact at all. The electronic flush actuation is illuminated with energy-saving LEDs.

**Mechanical actuation:**

With the mechanical actuation option, the flush is actuated by buttons. It is available in white and bright chrome.

"ceramic-Air"

An end to bad odours in the bathroom and toilet: The air purification system "ceramic-Air" works with a new kind of ceramic activated carbon filter. Odours are drawn away at the source and cleaned air is passed back into the room. There is no need for any extra fresh air which would first have to be warmed. The air purification system starts when a person approaches and stops automatically after a short run-on time, which avoids unnecessary power consumption. The ceramic activated carbon filter has a long life only has to be replaced after around five years.

"m-Lift"

TECElux enables you to adjust the height of the toilet ceramics at any time, even module has been installed. The ceramics do not have to be removed. The height of the ceramics can be continuously adjusted in an 8 centimetre range with an adjusting spindle. The glass front moves with the ceramics, so the overall appearance is not marred by joints or gaps.

"smart-Connect"

Round toilet ceramics

Rectangular toilet ceramics

Rim-free toilet ceramics

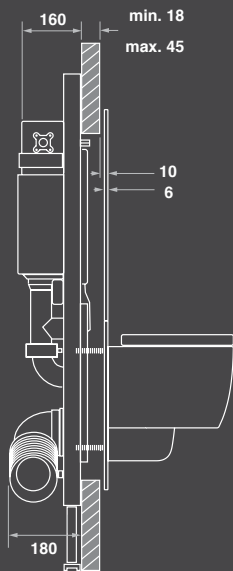

Shower toilet

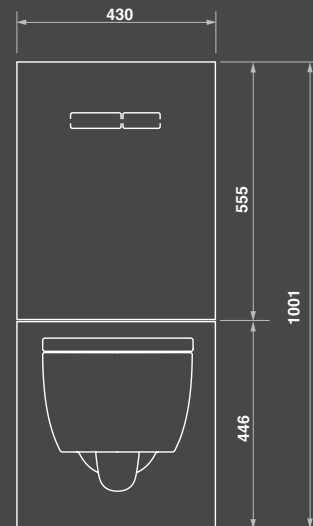

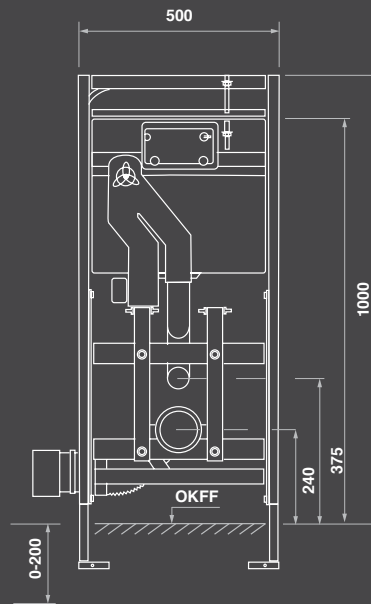

Shower toilet seat

TECElux can be combined with practically any ceramics and with shower toilets. Water and power connections are concealed behind the wall.

## TECElux – technology and assembly

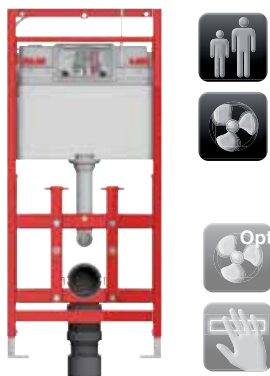

**Flat structure:** The two-part plate made of safety glass is 6 mm thick and is installed 10 mm in front of the wall.

**Walls without tiling:** The large-area glass plate effectively protects the wall behind against splashes. Tiles are therefore unnecessary. As a result, TECElux makes subsequent bathroom renovations easier.

### TECElux module

The TECElux module leaves all options open: Three different versions of the module are available.

#### Module TECElux 200

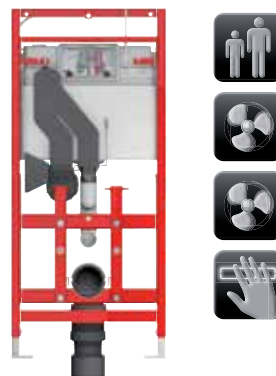

With TECE concealed cistern, dual flush technology and manual height adjustment. The flush is actuated mechanically by buttons or electronically via "sen-Touch". The module can be optionally fitted with the "ceramic-Air" air purification system (only in conjunction with the "sen-Touch" top glass plate).

sen-Touch (electronic)  
order no. 9 650 002

White buttons (mechanical)  
order no. 9 650 000

#### Module TECElux 400

With TECE concealed cistern, dual flush technology, manual height adjustment and „ceramic-Air“ air purification system. The flush is actuated only electronically ("sen-Touch").

Standard toilet  
Order no. 9 650 100

Shower toilet set  
Order no. 9 650 102

#### Sensor recognition range

The electronic device installed behind the glass facing switches on the illumination when a person approaches and activates TECElux. To avoid this happening by accident in small bathrooms, the recognition range can be reduced.

#### Recognition range

Small

**Normal**

#### Safety flush

A toilet not flushed thoroughly after use is unpleasant for the next user. Unpleasant surprises like this cannot be ruled out, particularly in public buildings, but the safety flush can help avoid them. Function "on": If a second flush is not carried out within 2 minutes after the last person recognition, an automatic flush is carried out. This function is only suitable for public toilets with a cubicle.

#### Function

Off

**On**

#### Illumination brightness of the display

The brightness of the display can be individually set. For setting "bright", the display can also be used to aid orientation in the dark.

#### Brightness levels

Bright

**Standard**

Dimmed

Darker

#### Subsequent odour extraction

Odour extraction is activated when someone approaches the detection range, and remains activated the whole time the user is there. When the person leaves the detection range, the follow-up time is activated

#### Follow-up time

1 min.

**1 min.**

5 min.

#### Hygienic flushing

The hygiene flushing function is actuated automatically if a user-actuated flush has not taken place within a defined time interval. Here, the water in connection line to the system is renewed. The hygiene flush can be set to different intervals according to user requirements.

#### Intervals

Off

Once per day

3 times per week

Twice per week

Once per week

Once in 2 weeks

Once in 4 weeks

#### Volume and intensity of odour extraction

The suction power and thus noise volume of the fan can be programmed. The standard setting offers low fan noise with good suction power.

#### Volume

Quiet

**Standard**

Power

#### Cleaning function

To prevent the flush from being actuated during cleaning of the sensor button, you can activate the cleaning function. The buttons are then deactivated for 30 seconds. After this period of time, their normal function is activated again. The cleaning function can be activated independently of the program mode by simultaneously pressing both buttons for 10 seconds.

#### Function

Off

**On**
